**Printing process may affect color shown. Please refer to actual window sample when selecting colors. Only use mild, water based household cleaner on painted product and rinse immediately with water. See full cleaning instructions for details.

Multiple Glass Options for Sliding Patio Doors

With multiple glass options to increase energy efficiency, there is a glass package to fit any climate need and budget.

Low-E Glass – With Low-E glass, two layers of silver coating reflect heat back to its source. So in the summer, the heat stays outside, while in the cold winter months, your home stays warm and comfortable. And because Low-E glass significantly reduces UV light, your furnishings, carpet and drapes are protected from the sun's damaging rays.

Low-E Glass with Argon Gas – Enjoy even more comfort with the addition of insulating argon gas to your Low-E glass doors. Argon is clear, odorless and denser than air, making it an ideal solution for enhanced insulation and noise buffering.

Ultra Low-E Glass with Argon Gas – Patio doors with this optional glass treatment offer superior thermal performance by combining three layers of silver coating with the insulating power of argon. This glass option is designed to meet stringent energy code criteria anywhere low thermal numbers are desired.

Our Warranty

Every Lansing patio door is backed by a limited lifetime warranty on the vinyl and all working parts as well as a 25-year warranty against glass seal failure. And throughout the warranty period, you can easily obtain replacement parts because each unit is individually registered.

See warranty for complete coverage details.

DO NOT REMOVE
 MAKE DATE: 9/10/2012 WARRANTY: 02589514
 SALES ORDER: 00735962

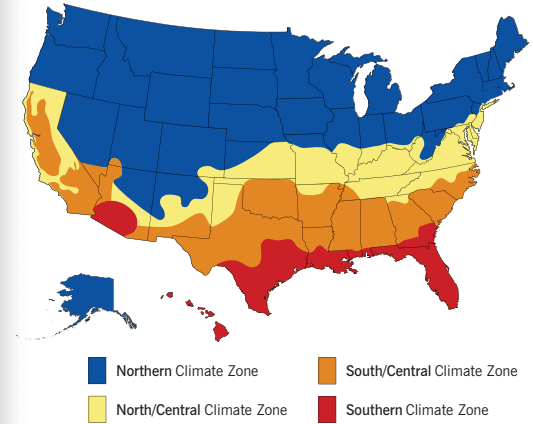

In the summer, Low-E glass reduces heat gain from the sun to help keep homes cooler.

In the winter, Low-E glass lets the warm, solar rays in while blocking the heat in the home from getting out.

ENERGY STAR CLIMATE ZONE MAP

CRITERIA FOR PATIO DOORS

| Glazing Level | U-Factor | SHGC |
|---------------|----------|--------|
| > 1/2 Lite: | ≤ 0.32 | ≤ 0.30 |

The Energy Star program for patio doors has only one U-Factor and one Solar Heat Gain Coefficient (SHGC) requirement for compliance.
