VINYL REPLACEMENT WINDOWS

The Lansing Difference

For more than 50 years, Lansing Building Products has set the standard for exceptional customer service and the finest exterior building materials in the industry. Our windows and sliding doors are recognized for their high-quality craftsmanship, innovative engineering and close attention to detail. You can feel comfortable knowing that when you choose Lansing, you're choosing a long-lasting, energy-efficient product that never compromises on style, performance or value. That's the Lansing difference.

Our High-Performance Vinyl

When it comes to low-maintenance, affordable windows, you can't beat vinyl. Lansing vinyl windows and doors never rust, rot or corrode. They never need painting, and they're easy to clean and maintain. You can also forget about scraping away paint that has chipped or peeled, or spending hours repairing rotted wood. With vinyl products from Lansing Windows and Doors, you enjoy beautiful windows that are practically maintenance-free and customizable to almost any style.

Vary Your Options, Vary Your Style

Lansing also provides a complete array of replacement windows in slider, bay and bow, casement and garden styles, as well as specialty shapes to give you the precise look you want. We also offer sliding patio doors in 5', 6', 6'4", 8', 9', and 12' models.

Go Green, Save Green

Eco-sustainability is something we take very seriously at Lansing. Our environmentally friendly products are built with the earth's limited resources in mind while offering you the energy efficiency and cost savings you're looking for in your replacement windows. First, we start with premium vinyl. Then we engineer a window with fusion-welded frames and sashes, security latches and locks, and optimal thermal performance. And because our vinyl is blended and extruded in-house, we oversee complete quality control and are able to pass on significant cost savings to you.

Leave the Weather Outside

Because windows are mostly glass, it's important that they be made with the highest-quality glass available. Our Series 80 windows and doors deliver superior thermal performance by combining our warm-edge sealant system with the insulating power of Low-E glass and argon gas.

Series 80 Warranty

We're so confident about the quality of our windows that we back them with a limited lifetime warranty on vinyl, glass and all working parts. Each product is individually registered with a product identification number, making ordering replacement parts easy and efficient. Plus, the Series 80 windows include a standard 25-year warranty on glass breakage, with the option of a lifetime glass breakage warranty.

Proud Supporter of ENERGY STAR®

By helping to maintain your home's indoor temperature, your windows help reduce power consumption and contribute to our country's conservation efforts. To help you select the optimum window or door for your home, the Department of Energy outlines specific thermal properties a window or door must have to achieve the ENERGY STAR rating. Lansing Windows and Doors enthusiastically supports the ENERGY STAR program and is committed to helping you select the appropriate glass option for your needs. Please consult your home improvement or new construction professional for specific thermal properties and requirements to ensure your home achieves the maximum energy savings possible.

WINDOWS & DOORS

The Ultimate in Style and Efficiency

Our Series 80 is the top-of-the-line in vinyl replacement windows, offering superior energy efficiency and durability, as well as our widest range of style options. When you choose a Series 80 window, you'll enjoy all the hassle-free, cost-saving benefits of vinyl plus unsurpassed elegance and style.

Standard Series 80 Features

Series 80 2- and 3-lite sliders available.

- Beveled mainframe offers a classic exterior appearance.
- Aluminum-reinforced, multi-cavity construction provides additional thermal performance and structural integrity.
- Warm-Edge Spacer System creates insulated glass panels with a maximum thermal performance and unsurpassed condensation resistance.
- Fusion-welded sashes and frame add strength and boost thermal performance.
- Low-profile positive-action deluxe cam lock. Two locks are standard on any window 27 1/4" and wider.
- Constant force coil balance permits easy sash movement.
- Sloped sill reduces air infiltration and allows for water runoff.
- Rounded sashes create additional interior beauty.
- Interlocking sashes keep out drafts.
- Rubber bulb seal helps block outside air.
- Dual push-button night latches provide optimum ventilation.
- Half screen is supported by a strong extruded aluminum frame.* (Full screen optional)
- Dual-fin weather stripping further reduces air infiltration.
- Integrated, slim line lift rail allows for smooth sash operation.
- Jamb depth is 3.25".
- Low-E glass with argon gas keeps indoor temperatures comfortable and consistent.
- 25-year glass breakage warranty ensures the longevity of your windows.
- DP 35 rating (DP 50 optional) (window size tested 44" x 75").

Series 80 2-Lite Slider

Series 80 3-Lite Slider

*Screens are not meant to restrain a child from falling through an open window.

Optional Features

- Factory mulling
- Bronze exterior laminate (White interior only)
- 5/8" or 3/4" flat or diamond grid
- 5/8" or 1" contoured grid
- 1 1/8" simulated divided lite grid
- Window Opening Control Device (WOCD) for fall prevention
- Double-strength glass
- Lifetime glass breakage warranty
- Ultra Low-E glass with argon gas

Multiple Glass Options for Series 80 Replacement Windows

With multiple glass options to increase energy efficiency, there is a glass package to fit any climate need and budget.

Standard Low-E Glass with Argon Gas

Low-E glass and argon gas come standard with every Lansing Series 80 window. With Low-E glass, two layers of silver coating reflect heat back to its source. So in the summer, the heat stays outside, while in the cold winter months, your home stays warm and comfortable. As an extra benefit, your furnishings, carpet and drapes are protected from damaging UV rays. Argon—a clear, odorless gas that's heavier than air—is added between the double panes of glass for even greater insulation and noise buffering.

Ultra Low-E Glass with Argon Gas

Windows with this optional glass treatment offer superior thermal performance by combining three layers of silver coating with the insulating power of argon. This glass option is designed to meet stringent energy code criteria anywhere low thermal numbers are desired.

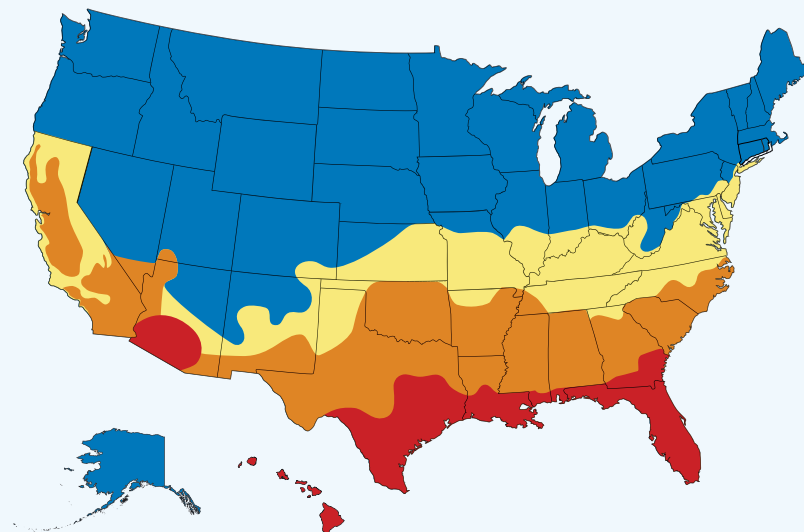

In the summer, Low-E glass reduces heat gain from the sun to help keep homes cooler.

In the winter, Low-E glass lets the warm, solar rays in while blocking the heat in the home from getting out.

WINDOWS & DOORS

ENERGY STAR CLIMATE ZONE MAP

- Northern Climate Zone
- North/Central Climate Zone
- South/Central Climate Zone
- Southern Climate Zone

CRITERIA FOR WINDOWS

Climate Zone	U-Factor	SHGC	
Northern:	≤ 0.27	Any	Prescriptive
	$= 0.28$	≥ 0.32	Equivalent Energy Performance
	$= 0.29$	≥ 0.37	
	$= 0.30$	≥ 0.42	
North/Central:	≤ 0.30	≤ 0.40	
South/Central:	≤ 0.30	≤ 0.25	
Southern:	≤ 0.40	≤ 0.25	
Air Leakage Rating:		$\leq 0.3 \text{ cfm/ft}^2$	

CRITERIA FOR PATIO DOORS

Glazing Level	U-Factor	SHGC	
≤ 1/2 Lite:	≤ 0.25	≤ 0.25	
> 1/2 Lite:	≤ 0.30	Northern:	≤ 0.40
		North/Central:	≤ 0.40
		South/Central:	≤ 0.25
		Southern:	≤ 0.25
Air Leakage Rating for Sliding Doors:			≤ 0.3 cfm/ft²

The ENERGY STAR program for windows divides the country into four distinct climate zones to recognize the varying heating and cooling months among the states. For patio doors, there is only one U-Factor and one Solar Heat Gain Coefficient (SHGC) requirement for ENERGY STAR compliance.

Please consult your home improvement or new construction professional for specific thermal properties that vary based on glass options and grid choices, and verify your window's actual performance to ensure ENERGY STAR rating in your specific climate zone.
